

OceanStream

Nano Wavemaker

Nano Size

The new JBJ OceanStream Nano circulation pump equipped with a magnetic mount and an articulating pivot ball.

The newly redesigned compact housing fits ideally in aquariums up to 30 gallons.

Maximum Flow

These innovative pumps utilize a unique PaddleDisc™ impeller that diverts water to the perimeter of the housing unlike traditional propeller based pumps.

This ensures maximum "random flow" in wide circular currents that provide gentle water movement without harming corals placed directly within its path.

Quiet Operation

Magnetic Mounting

Directional Water Flow

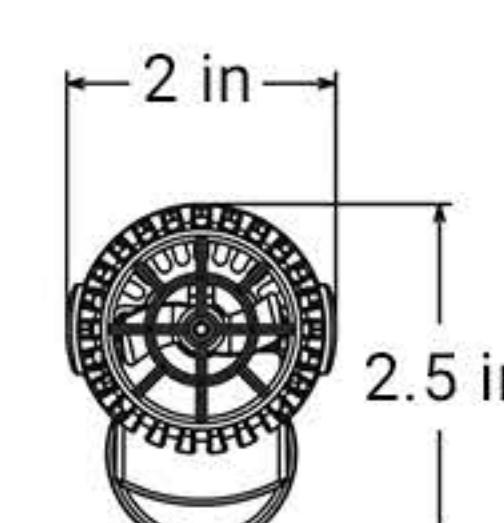

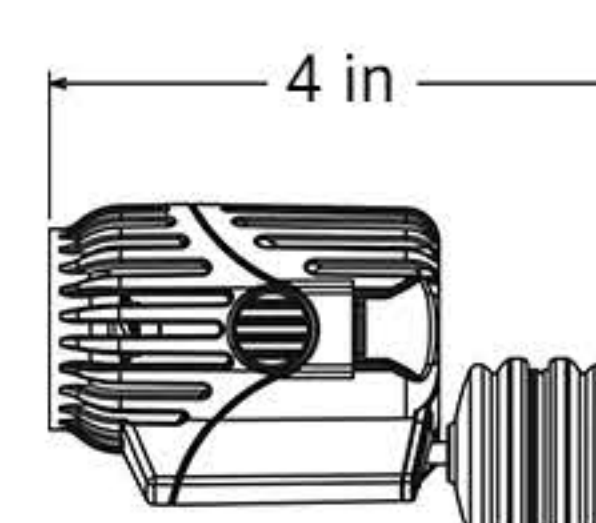

Randomize Your Water Flow

The OceanStream Nano is compatible with the JBJ OceanPulse Wavemaker Duo. Connect up to two circulation pumps to randomize your water movement.

Pump Specifications

Model	Power Consumption	Flow Rate	Dimensions	Cable Length
WM-3E	3 W at max flow	792 gal/h (3000 L/h)	4" x 2" x 2.5" (10 x 5 x 6 cm)	70 in (177 cm)
